

# GOOD SHEPHERD CONVENT, ANDHERI - MUMBAI

Life Skilled Training  
And Job Oriented  
Computer Courses

Monday 5<sup>th</sup> December 2016 was a wonderful day for the Good Shepherd Convent, Andheri, Mumbai because In association with the Rotary Club of Mumbai Green City and Vedanta Foundation, a new Computer Laboratory was officially inaugurated. There was great excitement written on the faces of 36 students who had registered their names for the computer classes. Fr. Jerome, the parish priest of Good Shepherd Church, said a short prayer and blessed the Lab amidst enthusiasm and support of Lay mission partners. After the formal inauguration everyone visited the lab to see the desk-top computers neatly arranged. The computers have been donated and generously funded by Vedanta Foundation for imparting job oriented certified courses at a low fee for the good of the Society. Sr. Pushpa lauded the efforts of Rotary Club of Mumbai Green City in making their dream come true of empowering adults to access digital learning and to enhance their computer skills. She said that it was their intention that every student who comes to learn will eventually be absorbed in some employment. In this digital age Computer education is a must and the launching of the computer lab could not be timelier. Those availing the facility were asked to attend course regularly and to take their learning seriously. On successful completion of courses, Job Fairs would be organized to facilitate employment. We wish every success to this Computer Laboratory.

Sr. Pushpa Louls
