

Save Trees

“Save trees ---- they will save you”

Trees are precious gift to our lives from the nature. They are very important to us, as they are very helpful and useful in everyday life.

Trees reduce pollution and increase rain. Wild animals and birds depend on trees for food and shelter.

Trees are life giving and generous. They give us oxygen to live cool and enjoy fresh air and to be happy, fruits and vegetable to gain good health, wood for making furniture and goods. Trees play a great role in human life and in the life of other creatures on earth. Without trees no life can exist on earth. So let's save trees and ***they will save us.***
